EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the attorney, Jorge Villabon (Reg. 52322) on 7/14/2009.

The Abstract of the application has been amended as follows:

The present invention relates to a method of control of at least one electronic appliance with the aid of a distant device such as a remote control. The device comprises means of control, typically the keys of a keypad and a means of selection of an appliance from among several. The method comprises the following steps: ~~[[-]]~~ activation of the device in a first mode where the means of control preferentially command the appliance selected by the means of selection, ~~[[-]]~~ programming of at least one association between a means of control and an appliance, and ~~[[-]]~~ activation of the associations so that the activation of a means of control commands the appliance associated during the programming step. The invention also relates to a device able to implement the method. ~~Figure for the abstract: 3.~~

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior arts teach a method of control of at least two electronic appliances with the aid of a remote device comprising means of control and a means of selection of an appliance from a plurality of appliances, wherein the method comprises the steps: programming at least two associations between at least two means of control and at least two appliances of said plurality of appliances, activating the device in a first mode where the appliance selected by the means of selection is controlled by the means of control according to associations that are not programmed during the step of programming, activating the device in a second mode wherein at least two appliances are continuously controlled by the means of control according to the associations performed during the programming step, said activating in the second mode being triggered by inputting a command on the means of selection, and re-activating the device in a first mode by inputting a new command on the means of selection..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
